DETAILED ACTION

1. The abstract of the disclosure is objected to because of undue length, as it is approximately 200 words long. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is indefinite because in line 3, there is no direct antecedent basis for the recitation of "the alkane hydrocarbon". It appears that claim 11 should depend from claim 10, which would provide the proper antecedent basis.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1724

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either EP 0,634,204 or Ho (5,015,268) or Kang et al. (2001/0132273) or Kang et al. (2001/0015334), all of which show the claimed invention.

6. The remaining references listed on both the PTO-1449 and the PTO-892 show art of interest.

7. Applicants response to this Office action should also include the following editorial changes: para. [0039], line 5, "use" should be "used"; para. [0044], line 8, the second occurrence of "of" should be deleted; para. [0054], line 6, "over" should be "oven"; para. [0060], line 2, "using" should be deleted; para. [0063], line 2, "ration" should be "ratio"; and, in para. [0065], line 4, "eliminates" should be "eliminate".

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).
